

De-Icing Insurance

WHAT IS DE-ICING?

Aircraft de-icing is required when the wings and other essential parts are covered in snow or ice. A unique solution is sprayed over the aircraft which melts the ice quickly, and prevents it re-freezing during take-off.

WHAT DOES DE-ICING A BLINK JET COST?

Our de-icing bills range from £450 to over £3,000 depending on the airport, the amount of solution used, and the number of times the aircraft has to be de-iced prior to take-off. An average bill is about £800. This bill is not included in our fares, and is passed onto passengers post-flight at cost.

WHAT IS DE-ICING INSURANCE?

Our insurance, when taken with a Blink flight, removes any liability for any de-icing carried out during your flight, no matter the cost. No nasty bills post-flight, guaranteed peace of mind.

HOW MUCH IS DE-ICING INSURANCE?

Insurance starts at:

£120 (€150 EUR) for the first sector and **£70 (€85 EUR)** for each additional sector within two days of the departure date. (A return trip longer than 2 days will be 2 x the first sector charge)

If you would like to take out de-icing insurance for your flight, contact our flight services team who will be more than happy to assist you.

Blink De-Icing Insurance must be taken out no later than 48 hours prior to departure, and must be paid for pre-flight.
